

HI TECH IMPLANT

Minimotor with a strong performance for a long life.

- * Electronically commutated (brushless) DC motors
- * Ø 22 - 60 mm
- * 1.2 - 400 watts
- * Electronically commutated
- * Neodymium magnets
- * Unsurpassed life time
- * No abrasion
- * Low noise level
- * High speeds even at low voltages
- * No magnetic cogging
- * Good heat dissipation, high overload ability
- * Very small electrical time constant and low inductance
- * Fully Autoclavable
